

## Class Room Management

---

BOSCO's class room management is a three days' training programme in three modules. The programme is aimed to help the school teachers in their teaching. The package is designed to equip them to impart the basic skills for effective teaching, learning and skill training. It covers learning styles, strategies and learning difficulties and learning methodology and implications for the world of employment. Our training programmes emphasize a method of teaching which makes the learning a joyful and playful experience leading to behavioural changes in the pupils.
